Evolutionary Computation for Dynamic Optimization Problems

Series: Studies in Computational Intelligence, Vol. 490

- ▶ **Compilation on the state-of-the-art of evolutionary computation for dynamic optimization problems**
- ▶ **Valuable reference book for the domain of Evolutionary Computation for Dynamic Optimization Problems in particular and Computational Intelligence in general**
- ▶ **Written by leading experts in the field**

This book provides a compilation on the state-of-the-art and recent advances of evolutionary computation for dynamic optimization problems. The motivation for this book arises from the fact that many real-world optimization problems and engineering systems are subject to dynamic environments, where changes occur over time. Key issues for addressing dynamic optimization problems in evolutionary computation, including fundamentals, algorithm design, theoretical analysis, and real-world applications, are presented. "Evolutionary Computation for Dynamic Optimization Problems" is a valuable reference to scientists, researchers, professionals and students in the field of engineering and science, particularly in the areas of computational intelligence, nature- and bio-inspired computing, and evolutionary computation.
